

PROHIBITION OF SALES TO UK RETAIL INVESTORS – The Securities are not intended to be offered, sold or otherwise made available to, and should not be offered, sold or otherwise made available to, any retail investor in the United Kingdom ("UK"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (as amended, the "EUWA"); or (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act 2000 (as amended, the "FSMA") and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA and regulations made thereunder (the "**UK Prospectus Regulation**"). Consequently no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (as amended, the "**UK PRIIPs Regulation**") for offering or selling the Securities or otherwise making them available to retail investors in the United Kingdom has been prepared and therefore offering or selling the Securities or otherwise making them available to any retail investor in the United Kingdom may be unlawful under the UK PRIIPs Regulation. Notwithstanding the above paragraph, in the case where the Issue Terms in respect of any Securities include a legend entitled "Prohibition of Sales to UK Retail Investors" but where the Issuer subsequently prepares and publishes a key information document under the UK PRIIPs Regulation in respect of such Securities, then following such publication, the prohibition on the offering, sale or otherwise making available the Securities to a retail investor in the United Kingdom as described in the above paragraph and in such legend shall no longer apply.

The Securities do not constitute a participation in a Collective Investment Scheme within the meaning of the Swiss Federal Act on Collective Investment Schemes ("CISA"). The Securities are neither subject to the authorisation nor to the supervision by the Swiss Financial Market Supervisory Authority FINMA and investors do not benefit from the specific investor protection provided under the CISA. Investors should be aware that they are exposed to the credit risk of the Issuer and the Guarantor, if any, respectively.

10. UNITED STATES TAX CONSIDERATIONS

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Notes, the Notes will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Notes for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Notes.

What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The payment of any amount due on the Securities is subject to the credit risk of the Issuer and Guarantor. The Securities are the Issuer's unsecured obligations and the Guarantee is the Guarantor's unsecured obligation. Investors are dependent on the Issuer's and Guarantor's ability to pay all amounts due on the Securities, and therefore investors are subject to the Issuer's and Guarantor's credit risk and to changes in the market's view of the Issuer's and Guarantor's creditworthiness. Neither the Securities nor the Guarantee are bank deposits, and neither are insured or guaranteed by any compensation or deposit protection scheme. The value of and return on the Securities will be subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness.
- GSG and its consolidated subsidiaries ("**Goldman Sachs**") is a leading global investment banking, securities and investment management group and faces a variety of significant risks which may affect the Issuer's and Guarantor's ability to fulfil their obligations under the Securities, including market risks, liquidity risks, credit risks, operational risks, legal and regulatory risks, competition risks and market developments and general business environment risks.
- GSI is a wholly-owned subsidiary of the Goldman Sachs group and a key banking subsidiary of the Goldman Sachs group. As a result, it is subject to a variety of risks that are substantial and inherent in its businesses including risks relating to economic and market conditions, regulation, market volatility, liquidity, credit markets, concentration of risk, credit quality, composition of client base, derivative transactions, operational infrastructure, cyber security, risk management, business initiatives, operating in multiple jurisdictions, conflicts of interest, competition, changes in underliers, personnel, negative publicity, legal liability, catastrophic events and climate change.
- GSI is subject to the Bank Recovery and Resolution Directive, which is intended to enable a range of actions to be taken by a resolution authority in relation to credit institutions and investment firms considered by the resolution authority to be at risk of failing and where such action is necessary in the public interest. The resolution powers available to the resolution authority include powers to (i) write down the amount owing, including to zero, or convert the Securities into other securities, including ordinary shares of the relevant institution (or a subsidiary) – the so-called "bail-in" tool; (ii) transfer all or part of the business of the relevant institution to a "bridge bank"; (iii)

¹ "Fees and commissions" are included within "non-interest income" and therefore are not included as a single line item.

² "Subordinated loans" are included within "total unsecured borrowings" and therefore are not included as a single line item.

transfer impaired or problem assets to an asset management vehicle; and (iv) sell the relevant institution to a commercial purchaser. In addition, the resolution authority is empowered to modify contractual arrangements, suspend enforcement or termination rights that might otherwise be triggered. The resolution regime is designed to be triggered prior to insolvency, and holders of Securities may not be able to anticipate the exercise of any resolution power by the resolution authority. Further, holders of Securities would have very limited rights to challenge the exercise of powers by the resolution authority, even where such powers have resulted in the write down of the Securities or conversion of the Securities to equity.

Risk factors associated with the Guarantor:

- GSG is the parent holding company of the group of companies comprising Goldman Sachs. Goldman Sachs is a leading global investment banking, securities and investment management firm that faces a variety of significant risks which may affect GSG's ability to fulfil its obligations under the Securities, including market risks, liquidity risks, credit risks, operational risks, legal and regulatory risks, competition risks and market developments and general business environment risks.
- Investors are exposed to the credit risk of GSG and its subsidiaries since the assets of GSG consist principally of interests in its subsidiaries. GSG's right as a shareholder to benefit in any distribution of assets of any of its subsidiaries upon the subsidiary's liquidation or otherwise, is junior to the creditors of GSG's subsidiaries. As a result, investors' ability to benefit from any distribution of assets of any of GSG's subsidiaries upon the subsidiary's liquidation or otherwise, is junior to the creditors of GSG's subsidiaries. Any liquidation or otherwise of a subsidiary of GSG may result in GSG being liable for the subsidiary's obligations which could reduce its assets that are available to satisfy its obligations under the guarantee.

What are the key risks that are specific to the Securities?

Risk factors associated with the Securities: The Securities are subject to the following key risks:

The value and quoted price of your Securities (if any) at any time will reflect many factors and cannot be predicted.

- The market price of your Securities prior to maturity may be significantly lower than the purchase price you pay for them. Consequently, if you sell your Securities before the stated scheduled redemption date, you may receive

far less than your original invested amount.

- Your Securities may be redeemed in certain extraordinary circumstances set out in the conditions of the Securities prior to scheduled maturity and, in such case, the early redemption amount paid to you may be less than the amount you paid for the Securities and might be zero.
- The terms and conditions of the Securities provide that all of the principal shall be repaid at maturity, such scheduled principal repayment will not provide protection from the effect of inflation. After adjustment for inflation, the real return (or yield) on the Securities at maturity could be negative.
- As the terms and conditions of your Securities provide that the Securities are subject to a cap, your ability to participate in any change in the value of the Underlying Asset(s) over the term of the Securities will be limited, no matter how much the level, price, rate or other applicable value of the Underlying Asset(s) may rise beyond the cap level over the life of the Securities. Accordingly, the return on your Securities may be significantly less than if you had purchased the Underlying Asset(s) directly.

Risks relating to the Underlying Asset:

- *The value of and return on your Securities depends on the performance of the Underlying Asset.* The return on your Securities depends on the performance of the Underlying Asset. The level of the Underlying Asset may be subject to unpredictable change over time. This degree of change is known as "volatility". The volatility of the Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. Volatility does not imply direction of the level of the Underlying Asset, though an Underlying Asset that is more volatile is likely to increase or decrease in value more often and/or to a greater extent than one that is less volatile.
- *Past performance of an Underlying Asset is not indicative of future performance.* You should not regard any information about the past performance of the Underlying Asset as indicative of the range of, or trends in, fluctuations in the Underlying Asset that may occur in the future. The Underlying Asset may perform differently (or the same) as in the past, and this could have material adverse effect on the value of and return on your Securities.
- Equity indices are comprised of a synthetic portfolio of shares, and as such, the performance of an Index is dependent upon the macroeconomic factors relating to the shares that underlie such Index, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as the index composition, which may change over time.

- A GSI é uma subsidiária totalmente detida pelo grupo Goldman Sachs e uma subsidiária bancária fundamental do grupo Goldman Sachs. Como resultado, está sujeita a uma variedade de riscos que são substanciais e inerentes aos seus negócios, incluindo riscos relacionados com condições económicas e de mercado, regulação, volatilidade do mercado, liquidez, mercados de crédito, concentração de risco, qualidade de crédito, composição da base de clientes, transações sobre derivados, infraestrutura operacional, cibersegurança, gestão de risco, iniciativas empresariais, operar em múltiplas jurisdições, conflitos de interesses, concorrência, alterações em underliers, pessoal, publicidade negativa, responsabilidade legal, eventos catastróficos e alterações climáticas.

Os poderes de resolução à disposição da autoridade de resolução incluem poderes para (i) definir o montante devido, incluindo a zero, ou converter os Valores Mobiliários noutros tipos de valores mobiliários, incluindo ações ordinárias da instituição relevante (ou de uma subsidiária) - a chamada ferramenta "bail-in"; (ii) transferir toda ou parte da atividade da instituição relevante para um "banco ponte" ("bridge bank"); (iii) transferir ativos depreciados ou problemáticos para um veículo de gestão de ativos; e (iv) vender a instituição relevante a um comprador comercial. Adicionalmente, a autoridade de resolução está habilitada a modificar as disposições contratuais, suspender os direitos de execução ou de rescisão que de outra forma poderiam ser desencadeados. O regime de resolução foi concebido para ser desencadeado em momento anterior ao da insolvência, e os titulares de Valores Mobiliários podem não ser capazes de antecipar o exercício de qualquer poder de resolução por parte da autoridade de resolução. Acresce que os detentores de Valores Mobiliários têm direitos muito limitados para contestar o exercício de poderes pela autoridade de resolução, mesmo quando tais poderes tenham resultado na depreciação dos Valores Mobiliários ou na conversão dos Valores Mobiliários em capital próprio.

Fatores de risco associados ao Garante:

- A GSG é a sociedade holding mãe do grupo de sociedades que compõem a Goldman Sachs. A Goldman Sachs é uma empresa líder global em banca de investimento, valores mobiliários e gestão de investimento que está sujeita a uma variedade de riscos significativos que podem afetar a capacidade do Emitente e do Garante de cumprir as suas obrigações ao abrigo dos Valores Mobiliários, incluindo riscos de mercado, riscos de liquidez, riscos de crédito, riscos operacionais e riscos legais e regulatórios, riscos de concorrência e de desenvolvimentos do mercado e riscos do ambiente empresarial em geral.
- Os investidores estão expostos ao risco de crédito do GSG e das suas subsidiárias, uma vez que os ativos da GSG consiste principalmente em interesses nas suas subsidiárias. O direito da GSG como acionista a beneficiar de qualquer distribuição de ativos de qualquer das suas subsidiárias em caso de liquidação da subsidiária ou por outro motivo é subordinado em relação aos credores das subsidiárias da GSG. Qualquer liquidação ou equivalente de uma subsidiária da GSG pode resultar na GSG ser responsável pelas obrigações da subsidiária, o que pode reduzir os seus ativos que estão disponíveis para satisfazer as suas obrigações ao abrigo da garantia.

Quais são os principais riscos específicos dos Valores Mobiliários?

Fatores de risco associados aos Valores Mobiliários: Os Valores Mobiliários estão sujeitos aos seguintes riscos fundamentais:

- O valor e o preço cotado dos seus Valores Mobiliários (se existente) em qualquer momento irá refletir muitos fatores e não pode ser previsto.
- O preço de mercado dos seus Valores Mobiliários antes da maturidade pode ser significativamente inferior ao preço de compra que pagou por eles. Consequentemente, se vender os seus Valores Mobiliários antes da data de resgate prevista, poderá receber muito menos do que o montante por si originalmente investido.
- Os seus Valores Mobiliários podem ser resgatados em determinadas circunstâncias extraordinárias, estabelecidas nas condições dos Valores Mobiliários, antes da maturidade prevista e, nesse caso, o montante de resgate antecipado que lhe é pago poderá ser inferior ao montante que pagou pelos Valores Mobiliários e poderá ser zero.
- Os termos e condições dos Valores Mobiliários estabelecem que todo o capital deve reembolsado na maturidade, tal reembolso de capital previsto não inclui proteção contra o efeito da inflação. Após ajustamento à inflação, o retorno real (ou *yield*) dos Valores Mobiliários na maturidade pode ser negativo.
- Como os termos e condições dos seus Valores Mobiliários definem que os Valores Mobiliários estão sujeitos a um limite máximo (*cap*), a sua possibilidade de participar em qualquer alteração no valor do(s) Ativo(s) Subjacente(s) ao longo do prazo dos Valores Mobiliários será limitada, independentemente do quão o nível, preço, taxa ou outro valor aplicável do(s) Ativo(s) Subjacente(s) possa subir acima do nível de limite máximo (*cap*) ao longo da vida dos Valores Mobiliários. Em conformidade, o retorno dos seus Valores Mobiliários podem ser menos significativos do que se tivesse adquirido o(s) Ativo(s) Subjacente(s) diretamente.

Riscos relacionados com o Ativo Subjacente:

- *O valor e o retorno dos seus Valores Mobiliários depende do desempenho do Ativo Subjacente.* O retorno dos seus Valores Mobiliários depende do desempenho do Ativo Subjacente. O nível do Ativo Subjacente pode estar sujeito a alterações imprevisíveis ao longo do tempo. Este grau de mudança é conhecido como "volatilidade". A volatilidade do Ativo Subjacente pode ser afetada por eventos financeiros, políticos, militares ou económicos nacionais e internacionais, incluindo ações governamentais, ou pelas atividades dos participantes nos mercados relevantes. Qualquer um destes eventos ou atividades pode afetar negativamente o valor e retorno dos Valores Mobiliários. A

volatilidade não implica a direção do nível do Ativo Subjacente, embora um Ativo Subjacente que seja mais volátil seja suscetível de aumentar ou diminuir de valor mais frequentemente e/ou em maior medida do que um que seja menos volátil.

- *O desempenho passado de um Ativo Subjacente não é indicativo de desempenho futuro.* Não deve considerar qualquer informação sobre o desempenho passado do Ativo Subjacente como indicativo da gama, ou tendências, das flutuações do Ativo Subjacente que possam ocorrer no futuro. O Ativo Subjacente pode ter um desempenho diferente (ou o mesmo) do passado, o que pode ter um efeito adverso material sobre o valor e retorno dos seus Valores Mobiliários.
- Os índices de ações são compostos por uma carteira sintética de ações (*synthetic portfolio of shares*), e como tal, o desempenho de um Índice depende dos fatores macroeconómicos relacionados com as ações subjacentes a esse Índice, tais como os níveis de juros e preços nos mercados de capitais, a evolução da moeda, fatores políticos, bem como fatores específicos da empresa, tais como a posição dos lucros, posição no mercado, situação de risco, estrutura acionista e política de distribuição, bem como a composição do índice, que pode mudar ao longo do tempo.
