

PROHIBITION OF SALES TO UK RETAIL INVESTORS: The Securities are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018 (as amended, the "EUWA"); (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act 2000 (as amended, the "FSMA") and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of UK domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129 as it forms part of UK domestic law by virtue of the EUWA (as amended, the "**UK Prospectus Regulation**"). Consequently, no key information document required by Regulation (EU) No 1286/2014 as it forms part of UK domestic law by virtue of the EUWA (as amended, the "**UK PRIIPs Regulation**") for offering or selling the Securities or otherwise making them available to retail investors in the United Kingdom has been prepared and therefore offering or selling the Securities or otherwise making them available to any retail investor in the United Kingdom may be unlawful under the UK PRIIPs Regulation. Notwithstanding the above, if the Dealer subsequently prepares and publishes a key information document under the UK PRIIPs Regulation in respect of the Securities, then the prohibition on the offering, sale or otherwise making available the Securities to a retail investor in the United Kingdom as described above shall no longer apply.

Qualifications in audit report on historical financial information: There were no qualifications in the audit report with respect to the Guarantor's historical financial information included herein.

Risk factors associated with the Guarantor: The Guarantor is subject to the following key risks:

- JPMorgan Chase is a major, global financial services group and faces a variety of risks that are substantial and inherent in its businesses, and which may affect the Guarantor's ability to fulfil its obligations under the guarantee, including regulatory, legal and reputation risks, political and country risks, market and credit risks, liquidity and capital risks and operational, strategic, conduct and people risks. Failure to appropriately manage these risks could have a material adverse effect on JPMorgan Chase's results of operations and financial condition.
- JPMorgan Chase Bank, N.A. is a wholly-owned subsidiary of the JPMorgan Chase group. It is the principal bank subsidiary of the JPMorgan Chase group. As such, it will be subject to the risks of the JPMorgan Chase group including regulatory, legal and reputation risks, political and country risks, market and credit risks, liquidity and capital risks and operational, strategic, conduct and people risks, and affected by events which impact the JPMorgan Chase group.

What are the key risks that are specific to the Securities?

Risk factors associated with the Securities: The Securities are subject to the following key risks:

- **At maturity, the Securities do not provide for the full scheduled payment of the face value of the Securities:** Depending on the performance of the Underlyings, you may lose some or all (subject to a minimum payment of EUR 0.10 per calculation amount) of your investment.
- **Risks relating to certain features of the Securities:**
 - The ability to participate in any positive change in the value of the Underlyings is limited, no matter how much the level, price or other value of the Underlyings rises above the cap level over the life of the Securities. Accordingly, the value of or return on the Securities may be significantly less than if you had purchased the Underlyings directly.
 - Investors in the Securities will be exposed to the performance of the Underlying which has the worst performance, rather than the basket as a whole. This means that, regardless of how the other Underlyings perform, if the Worst Performing Underlying fails to meet a relevant threshold or barrier for the payment of interest or the calculation of any redemption amount, you might receive no interest payments or return on your initial investment and you could lose some or all of your investment.
 - The coupon amount will only be paid if the level, price or other applicable value of the Underlyings on the relevant valuation date(s) either reaches or crosses one or more specific barrier(s). It is possible that such level, price or other applicable value of the Underlyings on the relevant valuation date(s) will not either reach or cross the barrier(s) (as applicable), and therefore, no coupon will be payable on the relevant coupon payment date. This means that the amount of coupon payable over the term of the Securities will vary and may be zero. The payment of coupon amount will be conditional on the value or performance of the Underlyings. The coupon amount payable will be zero on a coupon payment date if the Underlyings do not perform in accordance with the terms of the Securities although such payment will be deferred to the next coupon payment date. If the Underlyings meet the performance criteria, the coupon payable will be an amount for the current coupon payment date plus any amounts deferred from previous coupon payment dates where coupon was not paid. Investors in the Securities will not be paid any coupon or other allowance for the deferred payments of coupon and it is possible that the Underlyings never meet the performance criteria, meaning that investors will not receive any coupon at all for the lifetime of the Securities.
 - The final redemption amount is determined based on the performance of the Underlyings on the Final Valuation Date only (rather than in respect of multiple periods throughout the term of the Securities), and therefore investors in the Securities will not benefit from any movement in level of the Underlyings during the term of the Securities that is not reflected in the performance of the Underlyings on the Final Valuation Date.
- **Risks relating to the Underlyings:**

- Past performance of the Underlyings is not indicative of future performance or the range of, or trends or fluctuations in, the level, price or other value of such Underlyings that may occur in the future, and performance may be subject to unpredictable change over time. The Underlyings may perform differently from the historical performance and you may not realise the returns which you expect to receive from investing in the Securities. Investors will not have any legal or beneficial rights of ownership in the Underlyings, and no claim against the index sponsor or any other third party in relation to the Underlyings; such parties have no obligation to act in investors' interests. The Securities are linked to a basket of Underlyings. Correlation of basket constituents indicates the level of interdependence among the individual basket constituents with respect to their performance. Where the basket constituents are subject to high correlation, any move in the performance of the basket constituents will exaggerate the performance of the Securities, and this could have a highly negative (or positive) impact on the value of and return on the Securities.
- The market value of and the return on the Securities depends on the performance of the Underlyings and its components and other macroeconomic factors. The index sponsor (and the Issuer of the Securities) may be subject to regulatory changes regarding the publication and use of the Underlyings during the life of the Securities which may negatively impact the performance of the Underlyings. The Issuer and/or the Calculation Agent may adjust the terms of the Securities in respect of the Underlyings referenced in order to comply with statutory requirements and such adjustments may affect the value of and return on the Securities and may even result in the early redemption of the Securities (the early redemption amount of which may be less than the initial investment amount or zero). Where the Underlying is a price return index, investors will not participate in dividends paid on the components comprising the Underlying(s) and such Securities may not perform as well as if the holder had invested directly in such components or in a "total return" version of the Underlying or in another product.
- **No or limited liquidity:** The Securities may have no liquidity or the market for such Securities may be limited and this may adversely impact their value or your ability to dispose of them.
- **Secondary market value:** The market value of the Securities prior to maturity may be significantly lower than their original purchase price. Consequently, if you sell your Securities before their scheduled maturity (assuming you are able to), you may lose some of your original investment.
- **Early redemption:** The Securities may be redeemed prior to their scheduled maturity depending on the performance of the Underlying on each autocall observation date or in certain extraordinary circumstances and, in the case of the latter, the early redemption amount paid to investors may be less than their original investment. If the Securities are subject to early redemption, you may only be able to reinvest the proceeds on less favourable market terms compared to when the Securities were purchased.

O Emitente não assume qualquer obrigação legal em relação à realização da cotação em bolsa ou admissão à negociação a partir de qualquer data particular nem à manutenção da cotação em bolsa ou admissão à negociação que seja realizada.

Quais são os principais riscos específicos dos Valores Mobiliários?		
Factores de risco associados aos Valores Mobiliários: Os Valores Mobiliários estão sujeitos aos seguintes riscos chave:		
<ul style="list-style-type: none"> Na maturidade, os Valores Mobiliários não asseguram o total do pagamento programado do valor nominal dos Valores Mobiliários: Dependendo do desempenho dos Activos Subjacentes, poderá perder parte ou a totalidade (sujeito a um pagamento mínimo de EUR 0,10 por montante de cálculo) do seu investimento. Riscos relativos a determinadas características dos Valores Mobiliários: <ul style="list-style-type: none"> A possibilidade de participar em qualquer alteração positiva no valor dos Activos Subjacentes é limitada, mesmo que o nível, preço ou outro valor dos Activos Subjacentes exceda o limite máximo (<i>cap</i>) ao longo da vida dos Valores Mobiliários. Em 		

<p>conformidade, o valor ou rendimento dos Valores Mobiliários pode ser significativamente menor do que se tivesse comprado os Activos Subjacentes directamente.</p> <ul style="list-style-type: none"> Os investidores dos Valores Mobiliários estarão expostos ao desempenho do Activo Subjacente que tiver o pior desempenho, e não ao cesto como um todo. Tal significa que, independentemente de como os outros Activos Subjacentes se comportem, se o Activo Subjacente com Pior Desempenho não atingir um limiar ou barreira relevante para o pagamento de juro ou para o cálculo de qualquer montante de resgate, poderá não receber qualquer pagamento de juro ou retorno sobre o investimento inicial e poderá perder parte ou a totalidade do seu investimento. O montante do cupão só será pago se o nível, preço ou outro valor aplicável dos Activos Subjacentes, na(s) data(s) de avaliação relevante(s), alcance ou ultrapasse uma ou mais barreira(s) específica(s). É possível que tal nível, preço, ou outro valor aplicável aos Activos Subjacentes, na(s) data(s) de avaliação relevante(s), não alcance ou ultrapasse a(s) barreira(s) (consoante aplicável) e, por conseguinte, nenhum cupão será pago na data relevante de pagamento do cupão. Isto significa que o montante do cupão a pagar durante a vida dos Valores Mobiliários vai variar e pode ser zero. O pagamento do cupão será condicionado pelo valor ou desempenho dos Activos Subjacentes. O montante do cupão a pagar será zero na data de pagamento do cupão se os Activos Subjacentes não se comportarem de acordo com os termos dos Valores Mobiliários, apesar desse pagamento ser diferido para a próxima data de pagamento do cupão. Se os Activos Subjacentes cumprirem com os critérios de desempenho, o cupão a pagar será o montante da data actual de pagamento do cupão, acrescido de quaisquer montantes diferidos de datas anteriores de pagamento do cupão, em que o mesmo não tenha sido pago. Aos investidores em Valores Mobiliários não será pago nenhum cupão ou montante pelos pagamentos diferidos do cupão e é possível que os Activos Subjacentes nunca cumpram com os critérios de desempenho, o que significa que os investidores não receberão qualquer cupão durante a vida dos Valores Mobiliários. O montante de reembolso final é determinado com base no desempenho dos Activos Subjacentes na Data de Avaliação Final apenas (em vez de em relação a múltiplos períodos durante o prazo dos Valores Mobiliários) e, por esta razão, os investidores não beneficiarão de qualquer oscilação do nível dos Activos Subjacentes durante o prazo dos Valores Mobiliários que não seja reflectido no desempenho dos Activos Subjacentes na Data de Avaliação Final. <ul style="list-style-type: none"> Riscos relativos aos Activos Subjacentes: <ul style="list-style-type: none"> O desempenho anterior dos Activos Subjacentes não é um indicador do desempenho futuro ou do intervalo, tendências ou flutuações que possam ocorrer no futuro no nível, preço ou outro valor dos Activos Subjacentes, e o desempenho pode sofrer alterações imprevisíveis ao longo do tempo. Os Activos Subjacentes podem ter um desempenho diferente do desempenho histórico e os investidores poderão não receber o retorno que esperam receber ao investir nos Valores Mobiliários. Os investidores não terão qualquer direito, como beneficiários últimos ou enquanto detentores legais, sobre os Activos Subjacentes, nem poderão apresentar reclamação contra o patrocinador do índice ou qualquer outro terceiro em relação aos Activos Subjacentes; tais terceiros não têm a obrigação de agir no interesse dos investidores. Os Valores Mobiliários estão indexados a um cabaz de Activos Subjacentes. A correlação dos constituintes do cabaz indica o nível de interdependência entre os constituintes individuais do cabaz ao nível do seu desempenho. Quando os constituintes do cabaz apresentem uma correlação elevada, qualquer variação no desempenho dos constituintes do cabaz amplificará o desempenho dos Valores Mobiliários e isto pode ter um impacto altamente negativo (ou positivo) no valor e rendimento dos Valores Mobiliários. O valor de mercado e o rendimento dos Valores Mobiliários dependem do desempenho dos Activos Subjacentes, dos seus componentes e outros factores macroeconómicos. O patrocinador do índice (e o Emitente dos Valores Mobiliários) podem ser sujeitos a modificações regulatórias respeitantes à publicação e ao uso dos Activos Subjacentes durante a vida dos Valores Mobiliários, que podem afectar negativamente o desempenho dos Activos Subjacentes. O Emitente e/ou o Agente de Cálculo podem ajustar os termos dos Valores Mobiliários no que se refere aos Activos Subjacentes referenciados, de forma a cumprir com os requisitos legais e tais ajustes podem afectar o valor e o rendimento dos Valores Mobiliários e podem até levar ao resgate antecipado dos Valores Mobiliários (o montante do resgate antecipado poderá ser inferior ao montante do investimento inicial ou zero). Quando o Activo Subjacente corresponda a um índice de rendimento de preço, os investidores não participarão nos dividendos pagos sobre os componentes que incluem os Activos Subjacentes e tais Valores Mobiliários poderão não ter um desempenho tão bom como o que teriam caso o titular tivesse investido directamente em tais componentes ou numa versão de “retorno total” do Activo Subjacente ou noutro produto. Liquidez limitada ou inexistente: Os Valores Mobiliários podem não ter liquidez ou o mercado para tais Valores Mobiliários pode estar limitado e tal pode influenciar adversamente o seu valor ou a capacidade do investidor para dispor dos mesmos. Valor em mercado secundário: O valor de mercado dos Valores Mobiliários em momento anterior à maturidade pode ser significativamente mais baixo do que o preço original de compra. Consequentemente, se o investidor vender os seus Valores Mobiliários antes da maturidade agendada (assumindo que o vendedor o consegue fazer), o investidor poderá perder parte do seu investimento inicial. Resgate antecipado: Os Valores Mobiliários podem ser resgatados antes da maturidade agendada em função do desempenho do Activo Subjacente em cada data de observação de <i>autocall</i> ou em certas circunstâncias excepcionais e, nesse caso, o montante do resgate antecipado pago aos investidores pode ser inferior ao montante do investimento inicial. Se os Valores Mobiliários forem objecto de resgate antecipado, o investidor apenas poderá reinvestir os lucros em condições de mercado menos favoráveis quando comparadas com as aplicáveis à data de compra dos Valores Mobiliários.
